When you see a dozen or so kids standing listlessly on a corner, don't try to be funny when you pass them as every hand in the crowd is liable to contain a snow ball, which you will be made the target of on the slightest provocation.

A crowded house last evening greeted the first appearance of the Carson Dramatic Club in Reno in the play of "Nick of the Woods." The general verdict of all present was that it was the best amateur performance witnessed in Reno.—Journal.

The novel feature of a new electric boat, the idea of a French engineer, is a sea-water battery. The zinc and copper plates are under the boat, and can be raised or lowered by pulleys, serving as a kind of keel while at the same time driving a propeller by means of a motor.

The whistle on the yard engine run by Charley Thrall, has a sound that is a cross between the yell of a peacock and the bray of an ass. When the beastly contrivance is opened up and one of those heart-rending screeches is turned loose it makes a crack in the atmosphere that don't close up for several minutes.

The Central Nevada says: Black Mag, of whom we spoke in the last issue, has a daughter married to a tony Englishman who resides in San Jose, Cal. Occasionally a visit is made to the mother, and the Cortez people tell us that the daughter sports a mustach that would do credit to any man. She waxes and curls the prized oddity with all the comfort of a retired bondholder.

CONDENSED TELEGRAMS.

Mrs. Terry's physician says her madness is the result of nervous prostration, and is nothing permanent.

The "United States Daughters of 1812" regard the civil conflict as over. They named first among their Vice-Presidents Mrs. U. S. Grant and Mrs. Jefferson Davis, each accepting in a patriotic letter.

A leather belt intended to transmit 1000 horse-power has been made in Paris. It is 120 feet long and 7 feet wide and nearly an inch thick, the weight being a ton and a half; and it is to connect a fly-wheel 22½ feet in diameter with a pulley over 8 feet in diameter.

A new magnesium lamp, devised by M. Dronier, burns without attention for regular periods of 24 hours. A pound of magnesium is consumed in about 100 hours, giving a light equal to that of 130 pounds of candles, 80 pounds of petroleum, or somewhat more than 100 cubic yards of gas. The advantage is offered of freedom from risk of fire. The present running expense of the lamp exceeds 30 cents an hour, but with the anticipated great reduction in the cost of the metal, lighting by magnesium may be made fairly economical.

The scheduled time for cars on the proposed electric railway between Vienna and Buda-Pesth is expected to be 75 minutes for the entire distance of 150 miles. As planned, the road will have two main power stations, with 100 sub-stations. But only three stopping places. Each car will be 130 feet long, fitted with four bogie trucks, and an electric motor at each end will receive current through contact wheels running on conducting rails. The ends of the cars, to diminish air resistance, will be shaped like those of a ship.

Death of Charles Williams.

Wednesday afternoon at 10 minutes past 3 o'clock died Charles D. Williams, better known to every one in Reno as "Beech" Williams. The announcement of his death, although momentarily expected for the past few days, was a shock to all who knew him, and few there are who did not. He had lived almost all his life in Reno. Years ago he learned the printers' trade, and for a long time was a typo in the Journal office. He spent two years in Honolulu, but all the rest of his life since his childhood was passed here.—Journal.

Charles D. Williams was born in San Francisco 28 years ago. He was a member of Washoe Typographical Union and Amity Lodge, K. of P., under whose auspices he will be buried.

Williams attributed his sickness to cigarette smoking, yet this fact is not likely to prove a lesson to the confirmed cigarette fiends.

Beech as he was called, was well known by the printers of this section and none have but kind words for the departed typo, who has "turned the rule" of his existence.

Naturalism.

Mr. John Slater applies the term naturalism to the religion of which he is an exponent, and through the peculiar gift he possesses he certainly sees or knows things which puzzle those who listen to him. His tests are very interesting and entertaining. Last night was his last appearance, but he will give sittings today at the Arlington.
